

Executive Summary

This proposal describes a five-week website improvement project for a growing service business. The goal is to increase qualified leads, improve trust, and make the website easier to understand for new visitors.

Objectives

Clarify the offer, reduce friction in the contact path, improve mobile speed, and add measurement for campaign performance.

Scope of Work

Discovery and content audit will identify the strongest pages and the gaps that block conversion. Design updates will focus on the homepage, service pages, pricing section, and contact form.

Deliverables include wireframes, revised copy, visual design updates, implementation guidance, and quality checks before launch.

Technical Plan

The implementation will keep the existing CMS, reduce unused scripts, compress images, and improve semantic page structure. Tracking will include page views, form submissions, phone clicks, and campaign source attribution.

Protected terms for translation testing: CDN, SSL, CRM, FAQPage, LocalBusiness, AggregateRating.

Timeline and Responsibilities

Week 1: strategy and audit. Week 2: messaging and page structure. Week 3: design and review. Week 4: implementation. Week 5: launch checks and reporting.

The client will provide brand assets, service details, testimonials, and final approval within two business days of each review request.

Commercial Terms

Project fee: USD 7,500. Deposit: 40%. Balance: 60% on launch approval.
Optional monthly optimization retainer: USD 950.

This proposal is a sample document. It is intended for LayoutLingo testing and does not represent a real commercial agreement.
